

The item #27-01L-3-TGG provide contact captivation. So, when you insert the contact into the connector body, you could feel 'locked'.

Also you could use vernier calliper to measure the dimension 'H' (see attached picture).

Please also check the cable stripping dim. is proper or not. This information could be found from the attached drawing (see attached)

Interface Dimensions :

PLUG

check the dimension 'H'
(shall be about 0.20mm) to
know the contact position is
correct or not.
