READ THIS FIRST

These instructions are intended for qualified technical personnel. Prior commencing with any activities ...

- you must carefully read and understand this manual and
- you must follow the instructions given therein.

The ESCON 36/2 DC is considered as partly completed machinery according to EU Directive 2006/42/EC, Article 2, Clause (g) and is intended to be incorporated into or assembled with other machinery or other partly completed machinery or equipment.

Therefore, you must not put the device into service, ...

- unless you have made completely sure that the other machinery fully complies with the EU directive's requirements!
- unless the other machinery fulfills all relevant health and safety aspects!
- unless all respective interfaces have been established and fulfill the herein stated requirements!

1 About

1.1 About this Document

1.1.1 Intended Purpose

The purpose of the present document is to familiarize you with the ESCON 36/2 DC Servo Controller. It will highlight the tasks for safe and adequate installation and/or commissioning. Follow the described instructions ...

- to avoid dangerous situations,
- to keep installation and/or commissioning time at a minimum,
- to increase reliability and service life of the described equipment.

The document contains performance data and specifications, information on fulfilled standards, details on connections and pin assignment, and wiring examples.

1.1.2 Target Audience

The present document is intended for trained and skilled personnel. It conveys information on how to understand and fulfill the respective work and duties.

1.1.3 How to use

Take note of the following notations and codes which will be used throughout the document.

Notation	Meaning
(n)	refers to an item (such as order number, list item, etc.)
→	denotes “see”, “see also”, “take note of” or “go to”

Table 1-1 Notation used

1.1.4 Symbols & Signs

In the course of the present document, the following symbols and signs will be used.

Type	Symbol	Meaning	
Safety Alert	 (typical)	DANGER	Indicates an imminent hazardous situation . If not avoided, it will result in death or serious injury .
		WARNING	Indicates a potential hazardous situation . If not avoided, it can result in death or serious injury .
		CAUTION	Indicates a probable hazardous situation or calls the attention to unsafe practices. If not avoided, it may result in injury .
Prohibited Action	 (typical)	Indicates a dangerous action. Hence, you must not!	
Mandatory Action	 (typical)	Indicates a mandatory action. Hence, you must!	

Type	Symbol	Meaning	
Information		Requirement / Note / Remark	Indicates an activity you must perform prior continuing, or gives information on a particular item you need to observe.
		Best Practice	Indicates an advice or recommendation on the easiest and best way to further proceed.
		Material Damage	Indicates information particular to possible damage of the equipment.

Table 1-2 Symbols & Signs

1.1.5 Trademarks and Brand Names

For easier legibility, registered brand names are listed below and will not be further tagged with their respective trademark. It must be understood that the brands (the list below is not necessarily concluding) are protected by copyright and/or other intellectual property rights even if their legal trademarks are omitted in the later course of this document.

Brand Name	Trademark Owner
Windows®	© Microsoft Corporation, USA-Redmond, WA

Table 1-3 Brand Names and Trademark Owners

1.1.6 Copyright

© 2011 maxon motor. All rights reserved.

The present document – including all parts thereof – is protected by copyright. Any use (including reproduction, translation, microfilming, and other means of electronic data processing) beyond the narrow restrictions of the copyright law without the prior approval of maxon motor ag, is not permitted and subject to prosecution under the applicable law.

1.2 About the Device

The ESCON 36/2 DC is a small-sized, powerful 4-quadrant PWM servo controller for the highly efficient control of permanent magnet-activated DC motors up to approximately 72 Watts.

The featured operating modes – speed control (closed loop), speed control (open loop), and current control – meet the highest requirements. The ESCON 36/2 DC is designed being commanded by an analog set value and features extensive analog and digital I/O functionality.

The device is designed to be configured via USB interface using the graphical user interface «ESCON Studio» for Windows PCs.

You can download the latest ESCON software version (as well as the latest edition of the documentation) from the internet under → <http://escon.maxonmotor.com>.

1.3 About the Safety Precautions

- Make sure that you have read and understood the note “READ THIS FIRST” on page A-2!
- Do not engage with any work unless you possess the stated skills (→chapter “1.1.2 Target Audience” on page 1-3)!
- Refer to →chapter “1.1.4 Symbols & Signs” on page 1-3 to understand the subsequently used indicators!
- You must observe any regulation applicable in the country and/or at the site of implementation with regard to health and safety/accident prevention and/or environmental protection!

DANGER

High Voltage and/or Electrical Shock

Touching live wires causes death or serious injuries!

- Consider any power cable as connected to life power, unless having proven the opposite!
- Make sure that neither end of cable is connected to life power!
- Make sure that power source cannot be engaged while work is in process!
- Obey lock-out/tag-out procedures!
- Make sure to securely lock any power engaging equipment against unintentional engagement and tag it with your name!

Requirements

- Make sure that all associated devices and components are installed according to local regulations.
- Be aware that, by principle, an electronic apparatus can not be considered fail-safe. Therefore, you must make sure that any machine/apparatus has been fitted with independent monitoring and safety equipment. If the machine/apparatus should break down, if it is operated incorrectly, if the control unit breaks down or if the cables break or get disconnected, etc., the complete drive system must return – and be kept – in a safe operating mode.
- Be aware that you are not entitled to perform any repair on components supplied by maxon motor.

Electrostatic Sensitive Device (ESD)

- Make sure to wear working cloth in compliance with ESD.
- Handle device with extra care.

••page intentionally left blank••

2 Specifications

2.1 Technical Data

ESCON 36/2 DC (403112)		
Electrical Rating	Nominal operating voltage V_{CC}	10...36 VDC
	Absolute operating voltage $V_{CC \text{ min}} / V_{CC \text{ max}}$	8 VDC / 38 VDC
	Output voltage (max.)	V_{CC}
	Output current $I_{\text{cont}} / I_{\text{max}}$ (<60 s)	2 A / 4 A
	Pulse Width Modulation frequency	53.6 kHz
	Sampling rate PI current controller	53.6 kHz
	Sampling rate PI speed controller	5.36 kHz
	Max. efficiency	95%
	Max. speed	limited by max. permissible speed (motor) and max. output voltage (controller)
	Built-in motor choke	300 μ H; 2 A
Inputs & Outputs	Analog Input 1 Analog Input 2	resolution 12-bit; -10...+10 V; differential
	Analog Output 1 Analog Output 2	resolution 12-bit; -4...+4 V; referenced to GND
	Digital Input 1 Digital Input 2	+2.4...+36 VDC ($R_i = 38.5 \text{ k}\Omega$)
	Digital Input/Output 3 Digital Input/Output 4	+2.4...+36 VDC ($R_i = 38.5 \text{ k}\Omega$) / max. 36 VDC ($I_L < 500 \text{ mA}$)
	Encoder signals	A, A\, B, B\, (max. 1 MHz)
Voltage Outputs	Auxiliary output voltage	+5 VDC ($I_L \leq 10 \text{ mA}$)
	Encoder supply voltage	+5 VDC ($I_L \leq 70 \text{ mA}$)
Potentiometer	Potentiometer P1 (on board)	210°; linear
Motor Connections	+ Motor	
	- Motor	
Interface	USB 2.0	full speed (12 Mbit/s)
Status Indicators	Operation	green LED
	Error	red LED
Physical	Weight	approx. 30 g
	Dimensions (L x W x H)	55 x 40 x 16.1 mm
	Mounting holes	for M2.5 screws

ESCON 36/2 DC (403112)			
Environmental Conditions	Temperature	Operation	−30...+45°C
		Extended range *1)	+45...+81°C Derating: −0.056 A/°C
		Storage	−40...+85°C
	Humidity	20...80% (condensation not permitted)	

Remark: *1) Operation within the extended temperature range is permitted. However, a respective derating (declination of max. output current) as to the stated value will apply.

Table 2-4 Technical Data

2.2 Standards

The described device has been successfully tested for compliance with the below listed standards. In practical terms, only the complete system (the fully operational equipment comprising all individual components, such as motor, servo controller, power supply unit, EMC filter, cabling etc.) can undergo an EMC test to ensure interference-free operation.

Important Notice

The device's compliance with the mentioned standards does not imply its compliance within the final, ready to operate setup. In order to achieve compliance of your operational system, you must perform EMC testing of the involved equipment as a whole.

Electromagnetic Compatibility		
Generic Standards	IEC/EN 61000-6-2	Immunity for industrial environments
	IEC/EN 61000-6-3	Emission standard for residential, commercial and light-industrial environments
Applied Standards	IEC/EN 61000-6-3 IEC/EN 55022 (CISPR22)	Radio disturbance characteristics / radio interference
	IEC/EN 61000-4-3	Radiated, radio-frequency, electromagnetic field immunity test >10 V/m
	IEC/EN 61000-4-4	Electrical fast transient/burst immunity test ± 2 kV
	IEC/EN 61000-4-6	Immunity to conducted disturbances, induced by radio-frequency fields 10 Vrms
Others		
Environmental Standards	IEC/EN 60068-2-6	Environmental testing – Test Fc: Vibration (sinusoidal)
	MIL-STD-810F	Random transport
Safety Standards	UL File Number E207844; unassembled printed circuit board	

Table 2-5 Standards

••page intentionally left blank••

3 Setup

IMPORTANT NOTICE: PREREQUISITES FOR PERMISSION TO COMMENCE INSTALLATION

The **ESCON 36/2 DC** is considered as partly completed machinery according to EU Directive 2006/42/EC, Article 2, Clause (g) and **is intended to be incorporated into or assembled with other machinery or other partly completed machinery or equipment.**

WARNING

Risk of Injury

Operating the device without the full compliance of the surrounding system with the EU Directive 2006/42/EC may cause serious injuries!

- Do not operate the device, unless you have made completely sure that the other machinery fully complies with the EU directive's requirements!
- Do not operate the device, unless the other machinery fulfills all relevant health and safety aspects!
- Do not operate the device, unless all respective interfaces have been established and fulfill the requirements stated in this document!

3.1 Generally applicable Rules

For each possible motor variant you will find information on the from/to connections and the cables you will require. If you should decide not to use the ready-made maxon cables, you must establish the respective connections as to → chapter "3.4.7 ESCON 36/2 DC Connector Set" on page 3-28 and → chapter "4 Wiring" on page 4-31.

Maximal permitted Supply Voltage

- Make sure that supply power is between 10...36 VDC.
- Supply voltages above 38 VDC, or wrong polarity will destroy the unit.
- Note that the necessary output current is depending on the load torque. Yet, the output current limits of the ESCON 36/2 DC are as follows; continuous max. 2 A / short-time (acceleration) max. 4 A.

How to read the Wiring Details

The subsequent description follows this scheme:

- Column "**J... & Head A**": Pin number...
 - of the socket,
 - of the corresponding plug, and
 - of Head A of the matching prefab maxon cable.
- Column "**Prefab Cable**": Wire color of the prefab maxon cable.
- Column "**Head B**": Pin number of Head B of the matching prefab maxon cable.

3.2 Determination of Power Supply

Basically, any power supply may be used, provided it meets the minimal requirements stated below.

Power Supply Requirements

Output voltage	V_{CC} 10...36 VDC
Absolute output voltage	min. 8 VDC; max. 38 VDC
Output current	Depending on load (continuous max. 2 A; short-time (acceleration) max. 4 A (<60 s))

- 1) Use the formula below to calculate the required voltage under load.
- 2) Choose a power supply according to the calculated voltage. Thereby consider:
 - a) During braking of the load, the power supply must be capable of buffering the recovered kinetic energy (for example, in a capacitor).
 - b) If you are using an electronically stabilized power supply, make sure that the overcurrent protection circuit is configured inoperative within the operating range.

Note

The formula already takes the following into account:

- Controller's max. voltage drop of 1 V @ 2 A

KNOWN VALUES:

- Operating torque M [mNm]
- Operating speed n [rpm]
- Nominal motor voltage U_N [Volt]
- Motor no-load speed at U_N , n_0 [rpm]
- Speed/torque gradient of the motor $\Delta n/\Delta M$ [min/mNm]

SOUGHT VALUE:

- Supply voltage V_{CC} [Volt]

SOLUTION:

$$V_{CC} \geq \frac{U_N}{n_0} \cdot \left(n + \frac{\Delta n}{\Delta M} \cdot M \right) + 1 [V]$$

3.3 Cabling

Here you can get the connection information required to commission your ESCON 36/2 DC. You will find all details for both approaches, Plug&Play and making your own cables.

PLUG&PLAY

Take advantage of maxon's prefab cable assemblies. They come as ready-to-use parts and will help you to reduce commissioning time to a minimum.

- a) Check the «Cable Selector» (→Table 3-6) to find the cable assemblies' order number matching the setup you will be using.
- b) Follow the cross-reference to get the cable assemblies' pin assignment.

MAKE&BAKE YOUR OWN

- a) Check the «Cable Selector» (→Table 3-6) to find the required cables for the setup you will be using.
- b) Follow the cross-reference to get the cable's specification and pin assignment.
- c) Utilize the installation kit (→page 3-28) containing plugs and terminals that will fit the controller's sockets.

Cable			Socket	DC Motor with...

Legend: X = required / O = optional					

Table 3-6 Cable Selector

3.4 Connections

The actual connection will depend on the overall configuration of your drive system and the type of motor you will be using. Some connections must be established in a given way, while for motor (J2/J2A and encoder (J4/J4A) alternative plug-in locations can be chosen from.

Follow the description in given order and choose the connection scheme that suits the respective components you are using. For corresponding wiring diagrams → chapter “4 Wiring” on page 4-31.

3.4.1 Power (J1)

Suitable cable	Flat ribbon cable AWG 30

Table 3-17 Encoder Socket J4A – Specification & Accessories

Best Practice

- Because of its resistance against electrical interferences, **we recommend using differential scheme**. Nevertheless, the controller supports both schemes – differential and single-ended.
- The controller does not require an index impulse (Ch I, Ch II).
- For best performance, **we strongly recommend using encoders with line driver**. Otherwise, speed limitations may apply due to slow switching edges.

Differential	
Min. differential input voltage	±200 mV
Max. input voltage	+12 VDC / –12 VDC
Line receiver (internal)	EIA RS422 Standard
Max. input frequency	1 MHz

Figure 3-7 Encoder Input Circuit Ch A “Differential” (analogously valid also for Ch B)

Single-ended	
Input voltage	0...5 VDC
Max. input voltage	+12 VDC / -12 VDC
Logic 0	<1.0 V
Logic 1	>2.4 V
Input high current	I_{IH} = typically -50 μ A @ 5 V
Input low current	I_{IL} = typically -550 μ A @ 0 V
Max. input frequency	100 kHz

Table 3-22 USB Socket J7 – Pin Assignment & Cabling

USB 2.0 Type A-micro B Cable (403968)	
<div style="border: 1px solid black; padding: 2px; display: inline-block;">A</div>	<div style="border: 1px solid black; padding: 2px; display: inline-block;">B</div>
Cable cross-section	According to USB 2.0 specification
Length	1.5 m
Head A	USB Type "micro B", male
Head B	USB Type "A", male

Table 3-23 USB 2.0 Type A-micro B Cable

USB Standard	2.0 (Full Speed)
Max. bit rate	12 Mbit/s
Max. bus supply voltage	+5.25 VDC
Typical input current	60 mA
Max. DC data input voltage	–0.5...+3.8 VDC

3.4.7 ESCON 36/2 DC Connector Set

If you decide not to employ maxon motor's prefab cable assemblies, you might wish to use the prepackaged kit that contains all connectors required to make up your own cabling.

ESCON 36/2 DC Connector Set» (404404)		
For Socket	Specification	Quantity
J1	Hirose crimping socket, 2 poles (DF3-2S-2C)	1
J1, J2	Hirose crimping contact for Socket (DF3-22SC...)	6
J2	Hirose crimping socket, 3 poles (DF3-3S-2C)	1
J4	3M Retainer Clip with Strain Relief, H=13.5 mm (3505-8110)	1
J5	Hirose crimping socket, 6 poles (DF3-6S-2C)	1
J5, J6	Hirose crimping contact for Socket (DF3-2428SC...)	14
J6	Hirose crimping socket, 7 poles (DF3-7S-2C)	1

Table 3-24 ESCON 36/2 DC Connector Set – Content

**Best Practice**

If you should decide not to use the ready-made cable assemblies, we strongly suggest that you use the following hand tools:

- Hirose hand crimper (DF3-TA22HC) for crimping contacts DF3-22SC...
- Hirose hand crimper (DF3-TA2428HC) for crimping contacts DF3-2428SC...

3.5 Jumpers

STOP
Check on safety precautions before continuing (→page 1-5).

JUMPER JP1

For maxon DC motor with integrated Motor/Encoder Ribbon Cable, activate the motor terminal by setting both jumpers to CLOSED (→Figure 3-20, right).

Figure 3-18 Jumper JP1

Figure 3-19 Jumper JP1 – Location

Figure 3-20 Jumper JP1 – OPEN, Default Setting (left) / CLOSED (right)

3.6 Potentiometers

POTENTIOMETER P1

Adjustment angle	210°
Type	Linear

Figure 3-21 Potentiometer P1 – Location & Adjustment Range

3.7 Status Indicators

Light-emitting diodes (LEDs) indicate the actual operating status (green) and possible errors (red).

Figure 3-22 LEDs – Location

LED		Status / Error	
Green	Red		
off	off	INIT	
slow	off	DISABLE	
on	off	ENABLE	
2x	off	STOPPING; STOP STANDSTILL	
off	1x	ERROR	<ul style="list-style-type: none"> • V_{cc} Undervoltage Error • V_{cc} Overvoltage Error • +5 VDC Undervoltage Error
off	2x	ERROR	<ul style="list-style-type: none"> • Thermal Overload Error • Overcurrent Error • Powerstage Protection Error
off	3x	ERROR	<ul style="list-style-type: none"> • Encoder Cable Break Error • Encoder Polarity Error • DC Tacho Cable Break Error • DC Tacho Polarity Error
off	4x	ERROR	• PWM Set Value Input out of Range Error
off	on	ERROR	<ul style="list-style-type: none"> • Auto Tuning Identification Error • Internal Software Error
