

Coaxial Adapter, N Female / BNC Female Bulkhead

LCAD30017

Configuration

- N Female Connector 1
- BNC Female Connector 2
- Impedance 50 Ohm
- Straight Body Geometry
- Bulkhead Mount Method

Features

- Provides Between Series N to BNC Connections
- Gold Plated Center Contacts
- Bulkhead Mount

Applications

Description

These L-com RF Coaxial Adapters are used to interface between Type N to BNC with coaxial connections. The LCAD30017 is a straight bulkhead adapter with a female to female configuration. This Coaxial Adapter, N Female / BNC Female Bulkhead is made from brass and has a nickel finish. The Type N interface design is defined by Mil-STD-348A and has many popular features including a threaded coupling method with a robust center contact and outer conductor interface. Type-N adapters generally operate to 12 GHz but precision versions will operate to 18 GHz. The larger size provides a very secure and robust interface and is often used as the output port on RF equipment. Type-N adapters are often used as port protectors insuring that expensive test equipment ports are not damaged during repeated use. BNC adapters interface design is defined by Mil-STD-348A and has no tool required bayonet mount coupling mechanism with a robust center contact and outer conductor interface. BNC's generally work up to 3 GHz and are a cost effective way of insuring a highly dependable RF Coaxial connection. L-com's RF Coaxial and Triaxial adapters are in stock and ship same day.

Mechanical Specifications

Size		
Length	1.6in	40.64mm]
Width	0.62in	[15.75mm]

Description	Connector 1	Connector 2
