

TMCM-140-42

**1Axis
Controller /Driver
Motor Mountable (NEMA17)
2A / 24V
Optional CANopen**

INFO The TMCM-140-42-SE is an intelligent stepper motor controller and driver module to be mounted directly on a 42mm flange QMot stepper motor. This module converts the motor into a compact mechatronic device with bus oriented or stand-alone control. The chopSync™ feature allows high speed movement without resonance problems. The TMCM-140-42-SE comes with the PC based software development environment TMCL-IDE for the Trinamic Motion Control Language (TMCL™). Using pre-defined TMCL™ high level commands like „move to position“ or „constant rotation“ a rapid and fast development of motion control applications is guaranteed. The TMCM-140-42-SE can be controlled via RS232, RS485, CAN or USB interface. Communication traffic is kept very low since all time critical operations, e.g. ramp calculation are performed onboard. The TMCL™ program can be stored in the on board EEPROM for stand-alone operation. The firmware of the module can be updated via the serial interface. With the stallGuard™ feature it is possible to detect motor overload or motor stall. An optional firmware allows to control the module with the CANopen protocol.

MAIN CHARACTERISTICS

- ELECTRICAL DATA**
 - nom. 24V DC supply voltage (7V to 28.5V)
 - up to 2A RMS coil current
- SUPPORTED MOTORS**
 - two-phase bipolar stepper motors with 1A to 2A coil current
 - mountable on QMot motors with flange size: 42mm/NEMA17
- INTERFACE**
 - CAN 2.0b (up to 1Mbit/s) host, RS232 or RS485 interface and USB interface
 - 2 inputs for reference and stop switches
 - 2 general purpose inputs (24V compatible)
 - 2 open-collector outputs (open collector)
- FEATURES**
 - chopSync™ for high speed movement
 - up to 16 times microstepping
 - memory for 2048 TMCL commands
 - motion profile calculation in hardware (RT)
 - on the fly alteration of motion parameters (e.g. position, velocity, acceleration)
 - dynamic current control
- SOFTWARE**
 - stand-alone operation using TMCL or remote controlled operation
 - PC-based application development software TMCL-IDE included
 - optional CANopen firmware (CiA 301, 402)
- OTHER**
 - pluggable JST connectors
 - RoHS compliant
 - size: 60 x 60 mm²

ORDER CODE	DESCRIPTION
TMCM-140-42-SE (-option)	1-axis controller / driver module 2A / 24V
TMCM-140-CABLE	cable loom including all necessary cables (single ended)
Related products:	QMot motors QSH4218
INTERFACE OPTIONS	
232	USB & RS-232 interface (TMCL™ firmware)
485	USB & RS-485 interface (TMCL™ firmware)
CAN	USB & CAN interface (TMCL™ firmware)
CANopen	USB & CAN interface (CANopen firmware)
